

COMITATO D'INTESA
TBA LE ASSOCIAZIONI VOLONTARIE DELLA PROVINCIA DI BELLUNO

‘EcoTournament - Planet depends on us’

Capacity Building in the field of Youth project Seminar and Study Visit

November 12-17/2022, Mezzano (TN), Italy

ABOUT THE PROJECT

"EcoTournament - Planet depends on us" is a project that aims to strengthen the competencies of youth workers and young people in the field of environment and climate change through quality training and online tools, which improve youth workers' professional development and improve science, digital skills, citizenship and entrepreneurship competences among young people and to raise awareness on the need to protect the environment in the European Union and South Mediterranean region. During the Study visit and Seminar in Mezzano, the participants had the opportunity to visit some local good practices active in the field of sustainability, environmental protection, social innovation and community development.

ABOUT US - COMITATO D'INTESA (Hosting organization of the Seminar & Study visit)

Comitato d'Intesa is a volunteering association and it deals with a lot of different realities and associations of the province of Belluno. You can simply imagine Comitato d'Intesa as an umbrella non-profit organization that deals with different realities and other associations, among which we can find about 170 volunteering associations that are very active in the personal assistance and health care field and Civil protection assistance. Every association is independent, but Comitato d'Intesa has the role of coordinating, promoting and raising awareness about volunteering and all their activities.

Comitato d'Intesa started to operate in the Erasmus+ program in 2014, with many unique and interesting hosting projects so far, from Erasmus+ Youth Exchanges and Training Courses, to European Solidarity Corps volunteering projects.

Carrying out the Study visit and Seminar

FRIDAY 11.11.2022

Arrival day

SATURDAY 12.11.2022

10:30 AM - 12:30 PM

Welcoming the participants, getting to know each other and team building activities.
Introduction to the project and activities and program of the Study visits and Seminar.

3:30 PM - 5:30 PM

Brainstorming and activities on the environment and climate change, to make the participants reflect on the topic and debate to test sensitivity to the planet. A video was shown <https://www.youtube.com/watch?v=1Mw5ADaHyFo> and one local activity was presented <https://www.vaiawood.eu/> on the theme of natural disasters connected to climate change and good practices of resilience. An exchange between the experiences of the participants in the field of the environment and the fight against climate change was done.

SUNDAY 13.11.2022

10:00 AM - 12:00 PM

Treasure hunt to better know Mezzano, in mixed teams, and in the afternoon time to explore the village and the surroundings.

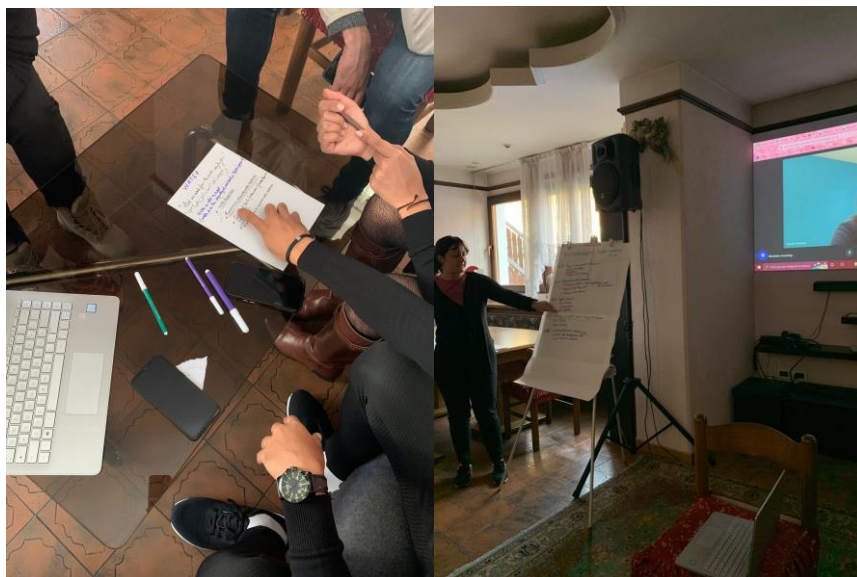

3:30 PM - 5:30 PM

Update on the project and redefinition of the Ecotournament modules

Update on the next steps of the project and meetings. Preparation of the index of the three modules Water, Air, and Land in mixed teams.

MONDAY 14.11.2022

10:00 AM - 11:30 AM

Meeting with Monica De Cet, representing Europe Direct - GAL Prealpi e Dolomiti. The EUROPE DIRECT MONTAGNA VENETA centre, at the Pre-Alps and Dolomites LAG, is a member of the Europe Direct network in Italy, which in turn is part of a family of centres at the European level. EUROPE DIRECT centres make Europe accessible to citizens on the ground and enable them to participate in debates on the future of the EU. The network is managed by the European Commission. They are also active in schools with presentations, debates on the EU and distribution of official publications.

After an introduction to the Centre, she showed some activities that the network did in some schools in the province of Belluno, sharing the experiences activated especially on sustainability-climate-environment-territory and bringing the results of the #TheFutureIsYours project.

2:30 PM - 4:30 PM Meeting in DUMIA in Feltre

Our tour to discover local excellence could only stop at the educational farm and the organic social garden promoted by DUMIA thanks to the project The construction of a dream - Dumia social cooperative.

Thanks to Simone and all the guys for introducing us to a new reality that makes sustainability (environmental, social and economic) its mission.

TUESDAY 15.11.2022

8:00 AM - 10:00 AM visit of the Social Dairy Primiero

Being friends with the environment means doing everything possible to respect and safeguard it.

This is the motto of Primiero Dairy, which has been promoting a virtuous path for years and has its roots in a local sustainable breeding and production system.

<https://www.caseificioprimiero.com/>

11:00 AM -12:00 PM

Visiting the village of San Martino di Castrozza and celebrating St. Martin's Day, meeting with the local community, participating in a concert of regional music, archery workshop, and garland braiding workshop with locals.

This was an opportunity to better get to know the local traditions and community.

3:30 PM - 5:30 PM

Bike tour along Claudia Augusta cycle lane

Among the most beautiful cycle paths in Trentino and easy to follow there are the 11 kilometres of the Primiero cycle and pedestrian path offering a postcard landscape with the Pale di San Martino in the background. The cycle path connects all the towns in the area (Imèr, Mezzano, Primiero and San Martino di Castrozza) and develops along the Cismon stream.

The departure was in Masi di Imer and you go along the Cismon stream: this stretch crosses woods and meadows, with the backdrop of the majestic Pale di S. Martino Dolomite group which dominates the whole valley.

Immediately after Mezzano (among the most beautiful villages in Italy), you return to pedalling in the shade in a wood close to the mountain and you arrive in San Martino di Castrozza.

In the centre of the village, the track splits into two, forming a ring: it passes through Transacqua, Tonadico, and then reaches Siror, the ring closes by returning to Mezzano. This activity helped them to better understand the role of the bicycle in the new sustainable urban mobility and to visit the surroundings.

WEDNESDAY 16.11.2022

9:30 AM - 12:30 PM Napb meeting

The last day of the study visit was dedicated to the educational path of ecological literacy "We don't have a planet B", carried out by the staff of Cantiere della Provvidenza and Insieme si può, which has the main objective of presenting school children elementary, middle and high school in the province of Belluno the themes of ecology, climate change and sustainability thanks to practical, interactive and emotional involvement activities "Non abbiamo un pianeta B (We don't have a planet B)" is part of the Generation for Regeneration project, promoted by the Committee of Understanding in partnership with the Cantiere della Provvidenza, Insieme si può, Portaperta social cooperative society ONLUS, Schools on the Net for a World of Solidarity and Peace, Belluno Association in the World and funded by the Cariverona Foundation.

3:00 PM - 4:00 PM

Online meeting with the Municipality of Ponte nelle Alpi in the province of Belluno, a good local community practice that has always been highlighted in terms of correct waste management. The study visits organized as part of the #Erasmus+ ET project are continuing at full speed. A special thanks today goes to the councillor for the environment of the Municipality of Ponte nelle Alpi Pierluigi Dal Borgo for having illustrated the door-to-door separate collection system and the related excellent results obtained over the last few years.

THURSDAY 17.11.2022

10:00 AM - 12:00 PM

Discussion and exchange of experiences on the visits made and new knowledge gained, with feedback on the experience and what will be useful for their professional life and for the didactic material. Some of the participants said that it was the first time they visited such realities and they liked it, taking it as a good practice to spread also in their countries.

3:30 PM - 5:30 PM

Continuation of the work on eco and didactic materials in mixed teams, where they did research and refined them, discussed them and supplement them with the knowledge gained during the study visit, and prepared a plan for the next steps of the work in the distance. Evaluation and greetings.

FRIDAY 18.11.2022

Departure day.
