Sustainable Development Goals Inspiration for youth entrepreneurship

Dissemination Report

The objective of the Dissemination Report is to present a summary of the planned dissemination activities.

The activities were carried out in order to promote the project results, ensuring the widest possible use of knowledge derived from the project.

Our dissemination strategy was to identify and involve key stakeholders (local partners, young people, volunteers, educators and teachers) from the start and throughout the entire project in order to ensure relevance and maximum exposure and influence.

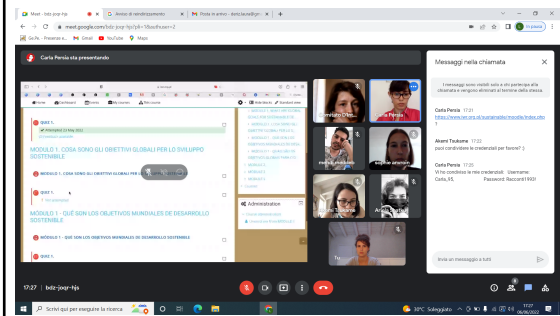

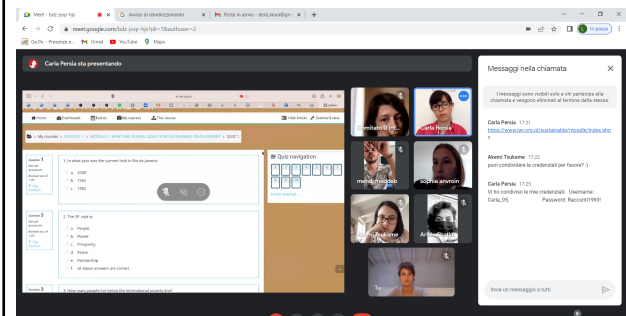

As established by the partnership, during June 2022 the project partner *Comitato d'Intesa* organized four different dissemination events, designed to draw together a wide range of people from the local education and training system and non-governmental organizations.

During the events the invited people could reflect on the key findings emerging from the project development and possibly suggest the future contribution of policy in this respect. The events were an opportunity to train the audience about the topic of sustainable development and youth entrepreneurship, presenting them the new e-learning platform (www.iwr.org.pl/sustainable), developed within the project: the main goal was to train the trainers (target group), with the aim of making the new educational tool known, encouraging them to use it with young students, volunteers or peers.

For each event, partners have filled in a template collecting all the information related to the event and the audience invited.
