Dissemination activities in Argentina

During the months of April and May, we were carrying out different activities within the SDGIYE project implemented through the Erasmus Plus program of the European Union. Due to the national geographical coverage of the RAMCC, the selection of participants for the different mobilities implied that those interested municipalities could nominate candidates and among them carry out some training instances and finally the selection of the participants. In addition, different dissemination campaigns were carried out through the institutional website of the RAMCC to inform about the project.

To complement the dissemination actions, some municipalities accompanied the selected participants by making notes on their official pages or through local media in each community. For the face-to-face workshop among the awareness activities for the World Environment Day on June 5, it was held on June 16, the presentation of the platform was made in a class of a secondary school, but it was difficult to achieve connection to the Internet.
